

# IT Education with Mobile Phone

A m-learning project

# Purpose of the project

---

- ▶ Ensuring enough aid for education with internet materials for the intermediate IT students.

# Issues Behind the Project

---

- ▶ Lack of sufficient skilled teacher to guide students of intermediate level in IT related courses.

# Methodologies to Solve the problem

---

- ▶ Hint System
- ▶ SMS System
- ▶ Marking System
- ▶ Question System

## Hint System:

---

A student has to give an exam on any selected topic(section).But with every test some hints will be provided . According to them ,a student can get help from a facebook group any group in the net.A lecture on this topic and also a tutorial also be provided with each test.

## Sms System:

---

When the student is out of question of any topic ,he/she can sms the teacher.

# Marking System:

---

- A) There are four questions for each section. If a student can answer all of them properly, then he/she is passed for the test and it is uploaded in our website.
- B) After each session, the teacher can see in website, the number of total passed tests by a student. According to this information he will be awarded in final exam mark counting.

# Question System:

---

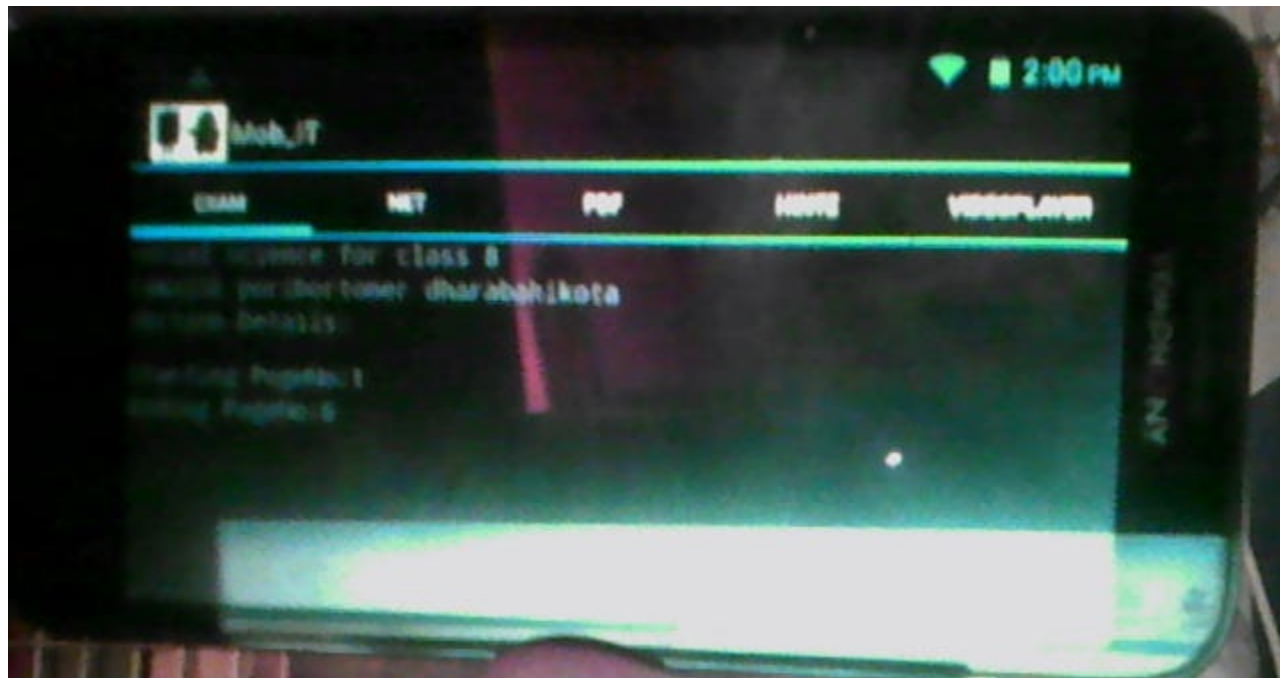

- ▶ After each exam a student give feedback. Reviewing the feedbacks, the question maker apply his idea to make the next question sets more useful for the student.
